	Manage and track classroom equipment and inventory					

## **Advanced Functionality**

- **Instructor Management:** Identify which instructors can teach which courses, and instantly see what days they are available to teach.
- Classroom Management: Set up classrooms, link them seamlessly through Google maps, and set up their specific parameters.
- **Course Setup:** Build each course (including images, videos, detailed descriptions, start/stop time, etc.), then reuse them to create training events.
- **Registration Management:** Have students register through your website or have admin register them manually or via Excel upload.
- Course Asset Management: Manage inventory for student workbooks, tablets, or physical gear across your entire organization, whether it's with an instructor, in a classroom, or with a customer.

## Interactive Instructor Dashboard

The top feature in our classroom calendar software is the ability for instructors to access an interactive dashboard. The instructor dashboard allows them to drag and drop course assets from the dashboard to the main screen, instantly playing videos and PowerPoints for the students on their tablets. They can also drag and drop quizzes into the student drop zone, allowing instant access to students. As students complete the quiz, collective results appear on the dashboard, providing the instructor insight into what areas of the course material to focus on the most.
